**Introduction to Pediatric Dentistry
For General Practitioners 2010**

Seminar Objectives

The pediatric dental summer seminar series is designed to review various current topics related to the treatment and management of the pediatric patient. The topics covered span a variety of specialties and allow the general practitioner, dental hygienist, or dental assistant working with pediatric patients to acquire a better understanding of specific issues related to the pediatric population.

Moderator: Doron Kochman DDS
Location: Concourse Room, Eastman Dental Center
Tuition: **FREE**
Time: Friday mornings July/August 8:00 AM - 9:00 AM

<u>Date</u>	<u>Seminar Topic</u>	<u>Lecturer</u>	<u>Time</u>
--------------------	-----------------------------	------------------------	--------------------

7/09/10	Behavior Management I Basic Behavior Management Techniques	Dr. Doron Kochman	8:00-9:00AM
---------	---------------------------------------------------------------	-------------------	-------------

Lecture Objectives

This course will review some basic techniques to manage pediatric patients. Upon completion of this course the clinician should be in a better position to deal with common behavioral issues.

7/16/10	Pediatric Periodontal Issues	Dr. Thomas Zahavi	8:00-9:00 AM
---------	------------------------------	-------------------	--------------

Lecture Objectives

In this lecture the pathogenesis of periodontal disease in children will be discussed along with the different etiological factors, possible risk factors and other conditions of the oral cavity presented in children. Some treatment options for these conditions will be suggested.

7/23/10	Eating Disorders	Dr. Mary Tantillo	7:45 –9:00AM
---------	------------------	-------------------	---------------------

Lecture Objectives

- 1.) Describe how eating disorders are diseases of disconnection and the impact of this on patient evaluation, management, and alliance with the dentist.*
- 2.) Identify signs/symptoms common to eating disorders presentation in the dentist's office.*
- 3.) Discuss at least two strategies to facilitate engagement of patients/families in treatment and their continued motivation for treatment.*
- 4.) Discuss at least two strategies promoting effective referral and collaboration with mental health professionals*

7/30/10

Pediatric Dental Trauma

Dr. Jeff Karp

8:00–9:00 AM

Lecture Objectives

1. *Discuss the typical clinical and radiographic features associated with each type of dental injury*
2. *Review the International Association of Dental Traumatology guidelines for primary and permanent teeth*
3. *Discuss the impact of patient age and root development on pulpal and periodontal healing after displacement injuries*
4. *Explain the etiology, clinical presentation, management, and outcomes of inflammatory root resorption and replacement resorption*
5. *Discuss treatment options for the permanent incisor with a hopeless prognosis*

8/6/10

Behavior Management II
Techniques to deal with
Autism, ADD, ADH

Dr. David Halpern

8:00-9:00AM

Lecture objectives

Many children come to the medical profession (dentists, in this case) with behavioral issues; to be forewarned is to be prepared

Different problems require different interactions from the medical professional

The child will not change; we, as the adult, must control ourselves and the environment to successfully work with children with disabilities

How we respond to a child's behavior will determine the outcome

8/13/10 "Development: It's Not Just for Kids"

Dr. Nina Schor

8:00-9:00AM

Lecture objectives

1. *List examples of clinical and basic science issues at the interface between development and aging;*
2. *Deduce the value and components of collaboration in the resolution of these issues;*
3. *Generate hypotheses that may drive future research initiatives in this area.*

8/20/10

Identification and Management of
Orthodontic Issues for the Pediatric Patient

Dr. Timothy Damon

8:00-9:00 AM

Learning Objectives

- 1) *Identify several space maintainers:*
 - a) *Band and loop*
 - b) *Lingual arch*
 - c) *Transpalatal arch*
 - d) *Nance appliance*
 - e) *Removable appliances*
 - f) *Partial braces*
- 2) *Analyze patient records for the appropriate use of the above space maintainers.*
- 3) *Analyze patient records to determine appropriate primary tooth extractions:*
 - a) *primary second molars*
 - b) *primary first molars*

- c) *over-retained / ankylosed primary teeth*
- d) *primary incisors*
- 4) *Identify anterior and posterior crossbites from patient photos.*
- 5) *Identify several types of crossbite correctors:*
 - a) *Removable appliances with springs*
 - b) *Quad helix*
 - c) *Rapid palatal expander*
- 6) *Analyze patient records to determine when crossbite correction is needed and which appliance(s) may be used.*
- 7) *Understand the rationale for expansion of dental arches in the absence of a crossbite.*

8/27/10

Lets Take a Medical History

Dr. Jeff Karp

8:00-9:00 AM

Lecture Objectives

1. *Discuss the differences in medical history taking between children, adolescents, and adults*
2. *Review typical findings in health histories of children with acute and chronic medical conditions*
3. *List common medications taken by children for management of systemic disease*
4. *Review the well child examination schedule as recommended by the American Academy of Pediatrics*

****Please note that the different time for the lecture on 7/23/10***

7/23/10

7:45-9:00 AM
